

CRG CUSTOM HOME QUESTIONNAIRE

Top 5 Questions to Getting The Conversation Started On New Home Construction

1. What is your total budget for new home construction?

(Be sure this cost includes land and their home)

2. Do you already have a lot? If so, tell us what neighborhood. If not, is there a location in mind?

(The requirements of an ARC can be very different depending on the location so this can affect your home design.)

3. What size home would you like?

If you are unsure about SQFT numbers tell us the number of bedrooms/bathrooms, the desired number of floors, along with any interior or exterior features that are important to you.

4. Are there any special requirements or features that are "must-haves" in your home?

(For example, a gourmet kitchen, an outdoor living space with pool and spa, handicap access, an oversized bonus room, home office, wine room, etc.)

5. What is your timeline to move into your home?

Answering these quick questions will help guide the conversation with your Custom Home Sales Consultant at CRG. Our team is here to assist you throughout the build no matter what stage of the process you are in.
